

Test Your Well Water

Protect your family's health

Free Nitrate & Bacteria Testing

Tuesday, August 30, 3—6:30 pm

(during the Butler Soil and Water Conservation District's Open House)

Who should participate?

- Is your well more than 40 years old?
- Is it less than 50 feet deep?
- Has it been more than a year since the water was tested?
- Does an infant or pregnant women drink the water?

If you answer **yes** to any of these questions, please join us at this event and bring a well water sample.

To collect your well water sample properly:

- You can use any clean jar that is free from scratches, soap and food residue on the inside. Or, pick up a jar from Butler SWCD, 1802 Princeton Rd, Hamilton.
- Plan to collect the sample as close to the time you bring it to the event as possible.
- If you can't collect the sample within an hour of the event, then keep it chilled, or refrigerate it.
- Remove any screen or filter from your faucet.
- Run water for five minutes to clear the lines and bring in fresh water.
- Do not touch the lip of the jar, inside the jar, or inside of the cap.
- Fill the bottle and cap it snugly.

Test Your Well is conducted in partnership
with the Butler Soil & Water Conservation
District, Miami U: IES and the Miami
Conservancy District
